Aayush Singh

Full-Stack Developer

aayushs290107@gmail.com | +91 7347333185 | Bangalore | LinkedIn | Portfolio | Github

CAREER OBJECTIVE

I am a Full-Stack Developer, seeking an internship to build scalable applications using React.js, Next.js, and modern web technologies. Experienced in working with REST APIs, OAuth, backend integrations, SEO management and containerized development using Docker.

EDUCATION

Bachelor of Technology (B.Tech) 2024 – 2028
Reva University
CGPA: 8.50/10

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern - CommuSync Pvt. Ltd. 07/2026 – Present
Bangalore

- Contribute to **QualiFire**, an AI-powered recruitment platform in a production-oriented engineering environment
- Worked with **Node.js, TypeScript, PostgreSQL, Prisma ORM and Redis** for backend development and database integration.
- Worked on **RBAC, authentication, access control, API security, input validation and rate limiting**
- Use **Docker and Docker Compose** to manage containerized development environments and **Playwright** for **Testing**
- Follow **Git/GitHub workflows**, including issue tracking, feature branches, pull requests, code reviews and controlled merges
- Collaborate with backend, frontend and QA teams on feature development, testing and debugging

SKILLS

Frontend: React.js | Next.js | TypeScript | Micro Frontend | Tailwind CSS | UI Performance Optimization
Backend & Database: Node.js | MongoDB/PostgreSQL | Redis | REST APIs | OAuth | Prisma ORM
DevOps & Tools: Docker | Git & GitHub | WebSockets | Chrome Extension (Manifest V3) | Playwright Testing
Security & Quality: API Security | Authentication & Authorization | Error handling | CI/CD | RBAC

PROJECTS

Apix 04/2026
Built a Git-inspired **CLI-based API testing tool,** reducing testing time by **30-40%**. Enables AI-powered request generation using Groq LLM execution, request storage, listing, and ID-based replay.
GitHub Repository: APIX

EnviroSim
Engineered a microclimate change simulator processing **1000+ environmental data points across 20+ regions**, as a collaborative project for **Google Solution Challenge**. Built an interactive map allowing users to locate their area and modify temperature, vegetation, rainfall, and pollution levels in real-time to observe **predicted environmental impact and insights**. Includes pre-defined "what if" scenarios.
GitHub Repository: EnviroSim

Travel Guardian 03/2026 – Present
Developing a real-time tourist safety web application that **forecast and visualizes risk levels** across various locations. Unified Leaflet.js for interactive maps, machine learning models for risk prediction, and WebSocket for live **SOS alerts with secure user authentication**.
GitHub Repository: Travel Guardian

Crowdfunding Platform 02/2026 – 03/2026
Developed a comprehensive **Full Stack** crowdfunding platform using Next.js, MongoDB, Redis (rate limiting), NextAuth.js and Razor pay. Implemented **scalable backend** system with payment gateway, **JWT-based authentication**, ownership permissions and **API rate limiting** to ensure scalability and production readiness.

Live App: RaiseIN

COMMUNITY EXPERIENCE

Core Development Team Member 10/2025 – Present
Google Developer Group On Campus (GDG), Bangalore Bangalore

- Contributed to **Al-based projects**, advancing innovative solutions.
- **Enhanced team communication** to maintain project alignment.
- **Coordinated** tech events and workshops, increasing community engagement
